Financial Performances

Revenue items

Sanitation and refuse service charges (+10%)

Positive variances reported indicates that actual revenue received were more than budgeted amount.

Interest earned – External investments (-16%)

The interest received for investments needs to be accounted for to ensure proper reporting of information. The municipal practice is to ensure that cash not needed in the immediate operational requirements is invested over the short-term period to ensure optimal use of cash resources.

Fines, penalties and forfeits (-74%)

The department is in process of implementation a turn-around strategy as per instruction of council. The time delay and numerous processes that needs to be implemented result in this taking longer than planned. The impact of the COVID lockdown and the subsequent losing of the service provider due to reduction in business activity is still being felt in the municipal operations.

Numerous vacancies relating to the traffic unit is also now being finalized and in the processes of being appointed. This should increase the manpower in the section and improve the overall performance in the section.

License and permits (-100%)

This is dependent on the due dates of individual licenses in the community. To date no revenues is reported for the quarter ending 30 September 2022.

Agency services (-56%)

Accounting for agency services mostly related to the functions performed on behalf of other organs of state, example Libraries and Traffic licensing. Income is normally based on actual expenditures of these functions.

Other own revenues (22%)

Gains (-100%)

The strategic decision to sell municipal vacant land not used in municipal operations is one of the key areas of council to generate revenues to improve services. The process is however dependent on the appointment of a auctioneer. The appointment of the auctioneer is in the final stage of the SCM process

and needs to be submitted to the BAC for approval. After the concluding of this process will the process start of selling of identified land.

The short, summarized plan by the department properties relating to the selling of land is as follows:

- I. Finalizing of identified areas and values
- II. Advertisement of auction
- III. Marketing of properties for sale
- IV. Auction date identified.
- V. Auction
- VI. Payments
- VII. Transfers of properties.

Expenditure items

Debt impairment (-100%)

The process of accounting for debt impairment needs to be implemented more regularly to ensure that the municipality can report on the “expense” write-off component of the revenue not collected. A process needs to be implemented to achieve the said objectives.

Finance charges (100%)

The biggest component of finance charges is the external interest payable on external loans. External loans is only payable on a six monthly basis during December and June. Other cost associated with finance charges is the employee relating benefits, actuarial valuations and this is only accounted at year-end.

Maintenance is a significant factor on the spending of contracted services. As the financial year progress so will the spending on maintenance increase and corresponding variances improve. Numerous transactions will also only be accounted for at the end of the financial year and therefor influence total spend.

Month on month comparisons of the outstanding debt balance compared R81.7m compared to the current R79.4m. The impact of the yearly property rates collection needs to be considered when comparing the collection rates for the period.
