4. SUMMARY FINANCIAL PERFORMANCE

Revenue performance

To date performance of the revenue budget records at 66% of adjustment budget information. The adjustment budget was tabled to Council at the end of January 2020 and numerous adjustments was processed to align actual performance to projections based on the mid-year reviewed information.

The main revenue categories of the budgeted revenues Property rated and Service charges perform above par and reflects 87 and 76% respectively. Administration will need to ensure that more expediate effort is inserted to ensure the budget for the "Sale of land" materialize given the cashflow impact this category will have on the municipal finances. Council also decided to allocate all proceeds with respect to the sale of land to bolstering the CRR and this will positively impact on overall liquidity and sustainability. Overall the municipality is on-par to achieve plan performance related to the expenditure budget.

Expenditure performance

The performance for the expenditure budget for the period ending 31 MARCH 2020 totals R220.9,m of a budgeted total of R395,7m. This reflect an expenditure performance of % of budgeted amounts.

The biggest spending categories related to the expense budget is performing on par and within projections of 73% for salary related expenditures and 46.8% for bulk purchases. The expenditures for bulk purchases should be course of concern due to its correlation nature with the sale of electricity.

The performance on bulk purchases got a positive correlation with the sales revenue and low reported information will also reflects in low revenues. This can have a cashflow impact and should therefor be monitored and analyze further. The effect of the Eskom load shedding also influences this figure.

Capital performance

Capital expenditures totals 40% of budgeted revenues. The municipality performance relating to the capital budget is slow and below par. the risk exist that the municipality may not achieve it targeted capital expenditures for the period. Commitments on the capital budget totals R5,365m that should enhance the capital performance for the year to date. The risk is still prevalent that capital performance will be below the actuals of the previous financial years.

Administration will need to institute measures to improve the capital performance for the remaining period ending 30 June 2020.

Cashflow performance

The municipal position related to the cash performance is positive for the period ending 31 March 2020 and the overall CCR positive reports at R35m for the period ending.

The risk of cash resource depletion remains high for all municipalities and the management of resources should be done in conjunction with cash management prudence to ensure optimal use of funds.

To date the municipality reports stable cash position of more that the recommended norm for cash resources as per the National Treasury's norms for current and liquidity ratios.

National state of disaster (lockdown) / Covid 19

The impact on the National lockdown and the Covid 19 will significantly impact the performance of the municipality operational as well as capital spending and performance for the financial year. Numerous concerns exist in terms of the municipal debt collection, ability of consumers to pay for services as well as the social impact on the Covid 19 crises on the communities. The ability to spend the capital budget will be negatively impacting on the municipal overall performance. Although this is a National disaster, each municipality will need to assess the impact on their own municipal areas.

The municipality will need to conduct a Risk assessment relating to the impact of Covid 19 on municipal operations and the overall effect this will have on the municipal functioning.

More details relating to the above will be included in the April reporting process.
