### 5. VARIANCE ANALYSIS BASED ON C1 BUDGET SUMMARY

Analysis of variance on the C4 report with a 10% variance on the performance of the municipality.

### Financial Performance

### Revenue Items

### **Electricity services charges**

At this stage of the municipal financial year the performance related to revenue totals R13,889m of a budget of R161,815m or 34.8% of year-to-date budget. This performance is directly related to the load shedding implemented by Eskom and the high cost of electricity sales that force consumers to change their usage behaviour.

The sale of electricity needs to be monitored carefully due to the impact of the source on the other operational performance of the municipal budget. A review of the electricity income will be done as part of the Adjustment budget process.

### Water service charges

Sale from water services is positive based on the Approved budget, this is mainly due to the change in the municipal cost structure. This will be consolidated and reviewed with the Adjustment budget in January 2024.

### Gains on disposal of Assets

Revenue from the sale of assets is another major key revenue source of the municipality. Approved budget of R15m was approved by Council. Administration is in the process of compiling a report to council to enable to process with the selling of vacant strategic land as identified. Close monitoring of the process and reporting will be done to Council.

### Expenditure Items

### Bulk purchases

Whereas the municipal income from the sale of electricity is reflected at 36% the Bulk purchases totals R52,849m of a budget of R125,894. That is 42% of budgeted amounts. The cost allocation of Eskom municipal account structure is disadvantaging the municipality. The municipality is paying various penalty cost because of loadshedding. This will be monitored continuously.
